

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A golf club of wood-type having a hollow head body, comprising:

a shaft; and

a metal head attached to the shaft, wherein the metal head comprises a body having an opening in which a striking face member is disposed, the striking face member the metal head including a plurality of metal pieces; and

C 1 wherein said metal pieces are made of forged or rolled material and appear on the striking face member ~~a common surface of the head~~ and are fixed together by ~~means of~~ laser welding.

2. (canceled)

3. (currently amended): A golf club according to claim 1, wherein the metal pieces have ~~having~~ different thicknesses ~~are fixed together by means of laser welding~~.

4. (currently amended): A golf club according to claim 1, wherein the metal pieces are ~~made of different metals are fixed together by means of laser welding~~.

5. (original): A golf club according to claim 4, wherein the difference in melting temperature between the metal pieces is 250°C or less.

6. (previously presented): A golf club according to claim 4, wherein at least 60% of the respective metal pieces are made of the same metal.

C1
7. (currently amended): A golf club of wood-type having a hollow head body, comprising:

a shaft; and

cont.
a metal head attached to the shaft, wherein the metal head comprises a body having an opening in which a striking face member is disposed, the striking face member ~~the metal head~~ including a portion formed through plastic working of a compounded metal plate fabricated through joining a plurality of metal pieces ~~plates~~ made of forged or rolled material by ~~means of~~ laser welding; and

wherein the compounded metal plate is fabricated by fixing together by laser welding the metal pieces so that the metal pieces appear on a an outside common surface of the striking face member of the head.

8. (canceled)

9. (currently amended): A golf club according to claim 7, wherein the compounded metal plate is fabricated by fixing together ~~by laser welding~~ metal pieces that ~~which~~ have different thicknesses.

10. (currently amended): A golf club according to claim 7, wherein the compounded metal plate is fabricated by fixing together ~~by laser welding~~ metal pieces made of different metals.

C¹ 11. (original): A golf club according to claim 10, wherein the difference in melting temperature between the metal pieces is 250°C or less

cont. 12. (original): A golf club according to claim 10, wherein at least 60% of the respective metal pieces are made of the same metal.

13. (canceled)

14. (canceled)

15. (previously presented): The golf club according to claim 1, wherein said plurality of metal pieces are greater than two.

16. (currently amended): The golf club according to claim 7, wherein said plurality of metal pieces ~~plates~~ are greater than two.

17. (currently amended): The golf club according to claim 1, wherein said plurality of metal pieces include an inner piece and an outer piece surrounding the inner piece.

18. (currently amended): The golf club according to claim 7, wherein said plurality of metal pieces ~~plates~~ include an inner piece and an outer piece surrounding the inner piece.

C!
19. (new): The golf club according to claim 1, wherein the metal pieces fixed together by laser welding form a smooth continuous surface.

cont
20. (new): The golf club according to claim 1, wherein the striking face member is formed by plastic working the metal pieces after the metal pieces are fixed together by laser welding.

21. (new): A golf club of wood-type having a hollow head body, comprising:
a shaft; and
a metal head attached to the shaft, wherein the metal head comprises a plurality of metal pieces; and

wherein the plurality of metal pieces are on an outside common surface of the head and are fixed together by welding, the welding process resulting in a smooth continuous outside common surface.

22. (new): The golf club according to claim 21, wherein the plurality of metal pieces are made of forged or rolled material.

C 1 23. (new): The golf club according to claim 1, wherein the striking face member is fixed to the opening of the body by welding.

(cont) 24. (new): A golf club of wood-type having a hollow head body, comprising:
a shaft; and
a metal head attached to the shaft, wherein the metal head comprises a body having an opening in which a crown member is disposed, the crown member including a plurality of metal pieces; and

wherein the metal pieces appear on an outside surface of the crown member and are fixed together by laser welding.

25. (new): The golf club according to claim 24, wherein the metal pieces are made of forged or rolled material.

26. (new): The golf club according to claim 24, wherein the crown member is fixed to the opening of the body by welding.

27. (new): A golf club of wood-type having a hollow head body, comprising:
a shaft; and
a metal head attached to the shaft, wherein the metal head comprises a body having an opening in which a side wall member is disposed, the side wall member including a plurality of metal pieces; and

CI
cont.
wherein the metal pieces appear on an outside surface of the side wall member and are fixed together by laser welding.

28. (new): The golf club according to claim 27, wherein the metal pieces are made of forged or rolled material.

29. (new): The golf club according to claim 27, wherein the side wall member is fixed to the opening of the body by welding.

30. (new): A golf club of wood-type having a hollow head body, comprising:
a shaft; and

a metal head attached to the shaft, wherein the metal head comprises a body having an opening in which a sole member is disposed, the sole member including a plurality of metal pieces; and

wherein the metal pieces appear on an outside surface of the sole member and are fixed together by laser welding.

C 1 31. (new): The golf club according to claim 30, wherein the metal pieces are made of forged or rolled material.

cont, 32. (new): The golf club according to claim 30, wherein the sole member is fixed to the opening of the body by welding.

33. (new): The golf club according to claim 1, wherein the striking face member is formed by applying post-machining to the metal pieces after the metal pieces are fixed together by laser welding.

34. (new): The golf club according to claim 33, wherein the striking face member is made by press forming the metal pieces after the metal pieces are fixed together by laser welding.

C1
35. (new): The golf club according to claim 21, wherein the outside common surface is formed by applying post-machining to the metal pieces after the metal pieces are fixed together by laser welding.

concl
36. (new): The golf club according to claim 35, wherein the outside common surface is made by press forming the metal pieces after the metal pieces are fixed together by laser welding.
